

Kako vidimo boje

Anatomija oka

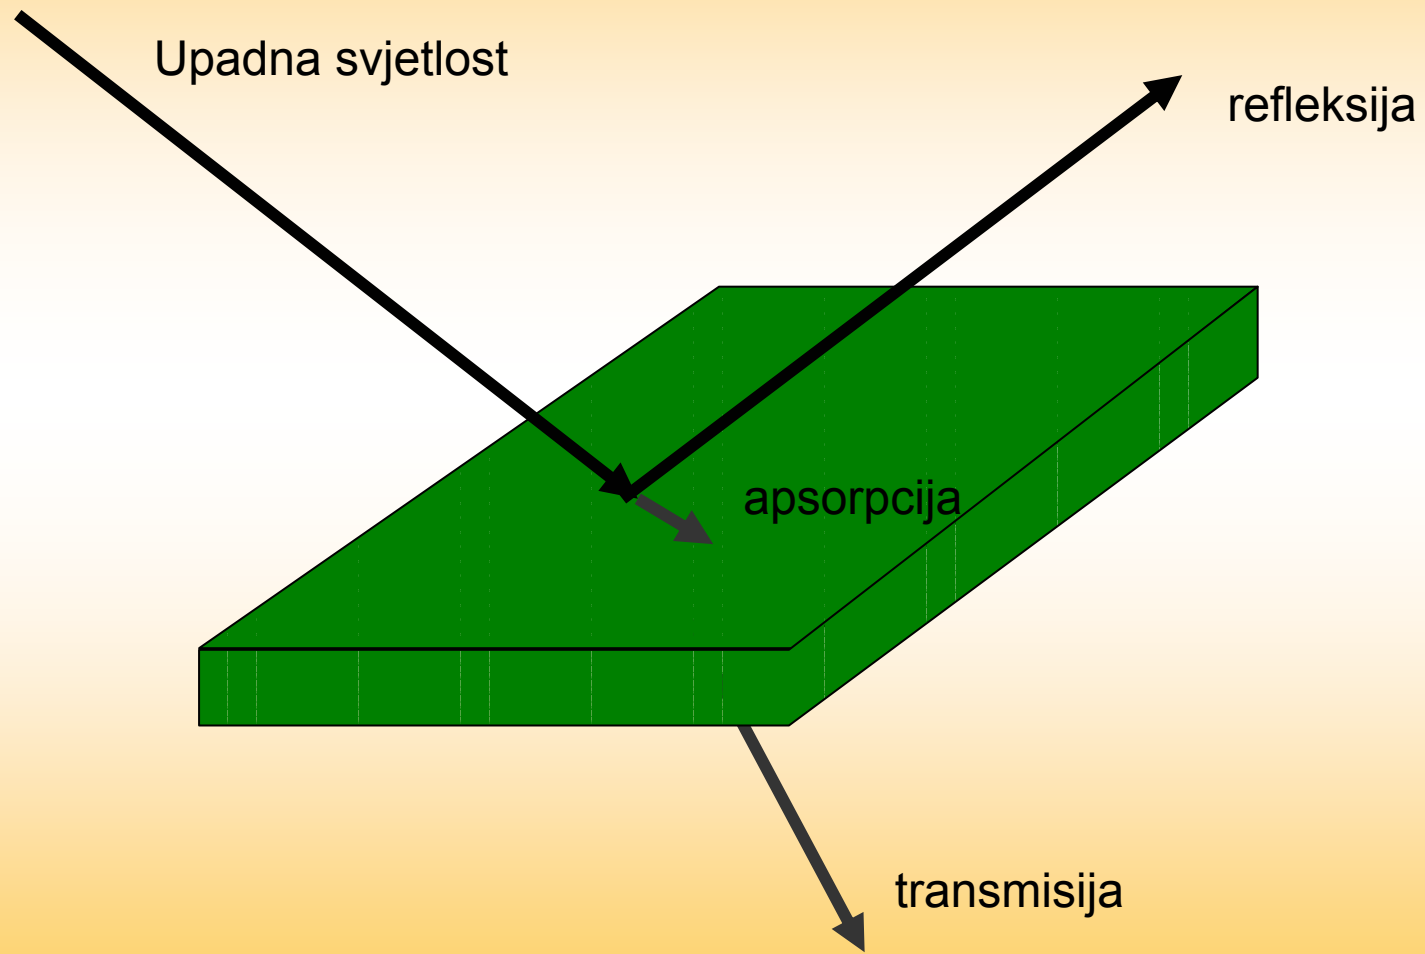

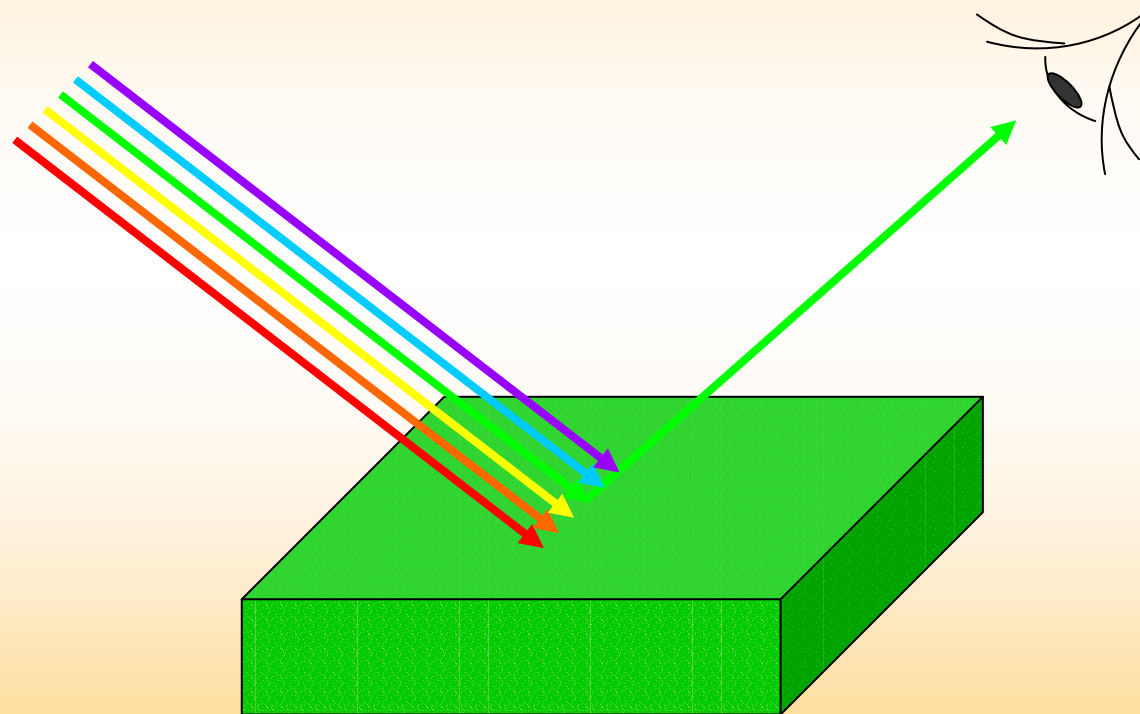

Ovako vidi čovjek

a ovako pas

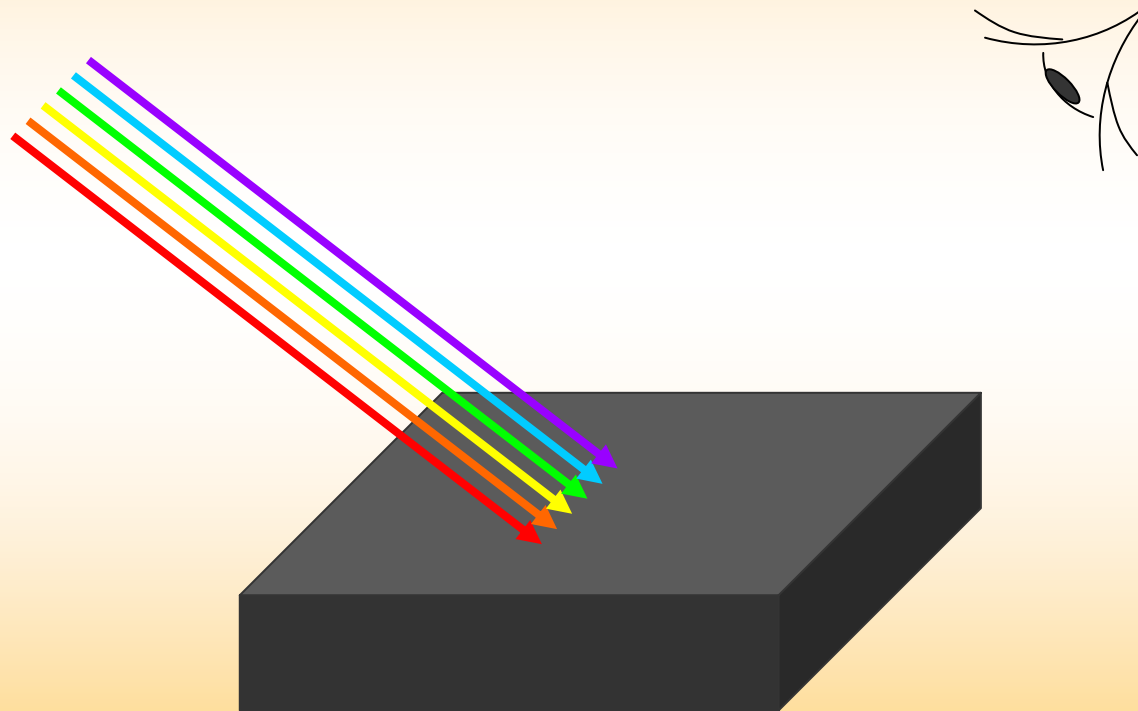

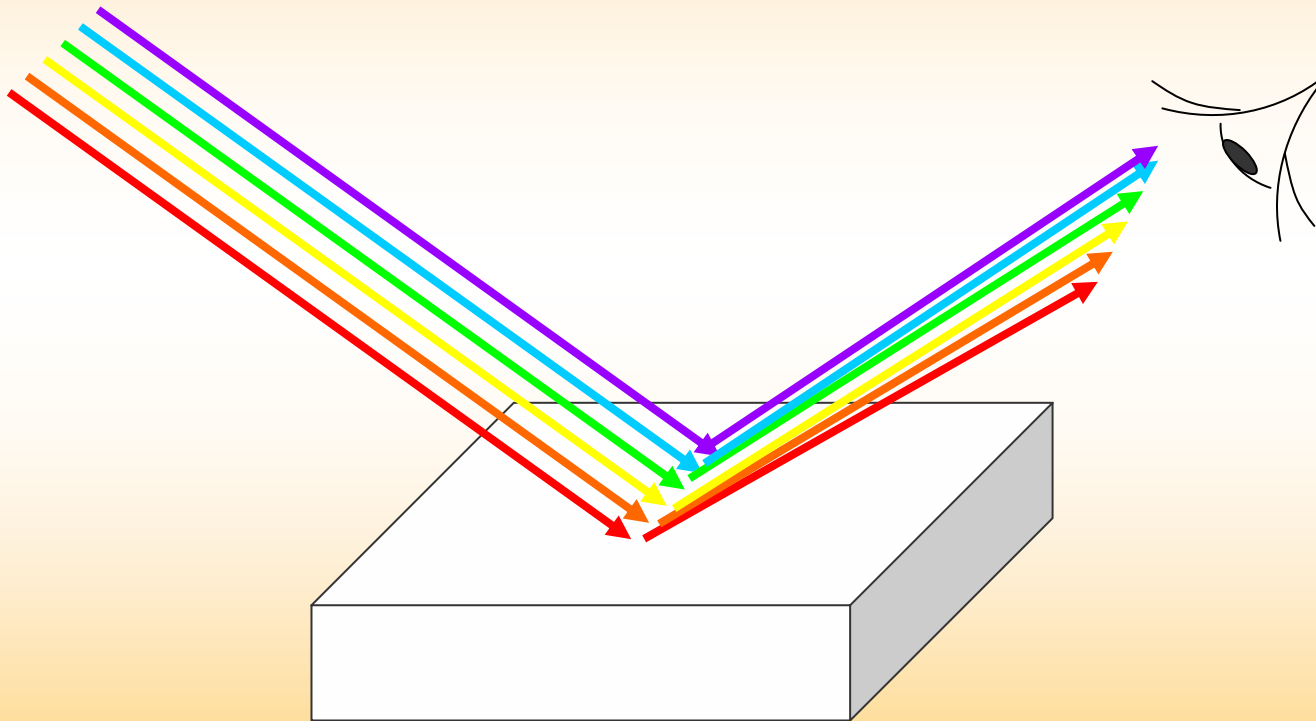

Predmet je zelen

Predmet je crn

Predmet je bijeli

Predmeti nemaju boju, nego sadrže pigment koji upija i odbija svjetlost pa ih vidimo obojenima. Zeleni predmet vidimo zelenim samo kad na nj upada bijela ili zelena svjetlost.

Zašto je nebo plavo?

Zašto su oblaci bijeli?

Zašto je sumrak crven?

Podne

Svitanje ili sumrak
